Product Data Sheet

Chemical Name:	Coconut Fatty Acid Diethanolamide
Registration M.O.H. No. :	38/10275
Structure:	
Appearance:	Light, yellow, Oily liquid at 20°C.
Character:	Non Ionic
Free Fatty Acid:	1% max.
Water:	0.5% max.
Amide Content	84-86%
Glycerol:	9-9.3%
PH value(2% aq. Solution):	8.5 – 10.5
Properties:	<ul style="list-style-type: none">- Super fatty action on skin- Increased viscosity & foam stability- Mixed with other emulsifiers, it stabilizes emulsions- It can be combined with different kinds of surfactants & easily incorporated in to cosmetic preparations.
Applications:	CFAD may be used in many formulations of shampoos, shower baths, liquid hand-cleaners and foam baths.
Storage:	Recommended store at room temperature
